¹Please consult the Heritage G label for appropriate rates and directions for use. ²Cone setting of 7 suggested. Calibrated to ground speed of 3 mph unless otherwise noted.

Spreader settings are influenced by factors such as speed, equipment wear, and condition of spreader. Because of this, published spreader settings are a starting point for calibration of your spreader to properly apply Heritage G at labeled rates. Methods to calibrate spreaders can be found in *The Mathematics of Turfgrass Maintenance 4th Edition* by Christians and Agnew, Ann Arbor Press/John Wiley & Sons, Inc.
